Supported Decision-Making Basics

MORGAN K. WHITLATCH
DAVID GODFREY

Our life is our choices
Fundamental Human and Constitutional Rights

"I am my choices. I cannot not choose. If I do not choose, that is still a choice. If faced with inevitable circumstances, we still choose how we are in those circumstances.”
- Jean Paul Sartre

What If....

- Your life decisions were called into question by people close to you?
- Your personal choices were used as “evidence” that your decision-making capacity was not adequate or in decline?
- Concerns about your health or safety were determined to be more important than your personal history, beliefs, heritage, and preferences?
- You were not included in discussions about where you live, what medical treatment you receive, and how your money is spent?
Supported Decision Making: What?

- Empowering persons with disabilities (including changes in memory and cognition)
- To make choices
- With the help from supporters/advisors, who assist them to:
  - To understand and explore the options
  - To know the risks and benefits of those options
  - To get guidance and recommendations
  - To make and communicate a choice
  - To carry out that choice, if help is needed to do so.
- SDM mirrors how everyone makes decisions.
- SDM is an emerging nationally and internationally recognized alternative to adult guardianship.

Supported Decision-Making: Why?

- SDM has “strong potential for promoting favorable outcomes in the lives of people with disabilities and older adults”
- SDM and Human Dignity:
  - Recognizing the inherent value and worth of a person as a human being
  - Honoring that person’s unique identity
  - Preserving any existing capacity
  - Ensuring access to accommodations as needed.
Self-Determination

- **Life Control**
  - People’s ability and opportunity to be causal agents in their own lives.
- Studies have shown people with disabilities and greater self-determination are:
  - More independent
  - More integrated into their communities
  - Healthier
  - Better able to recognize and resist abuse
- Older adults with more self-determination have improved psychological health, including better adjustment to increased care needs.

Without Self-Determination . . .

When denied self-determination, people can:

Experience “low self-esteem, passivity, and feelings of inadequacy and incompetency,” decreasing their ability to function (Winick 1995, p. 21).

**Decreased Life Outcomes**

Overbroad or undue guardianship can cause a “significant negative impact on . . . physical and mental health, longevity, ability to function, and reports of subjective well-being” (Wright, 2010, p. 354)
Supported Decision-Making: How?

- There is no “one size fits all” method.
  - SDM is a paradigm, not a process of program
  - It means working with the person to identify where help is needed and how it can be provided.
  - The key question is: “What will it take?”

- It can include, as needed and appropriate:
  - Informal support
  - Written agreements
  - Formal Micro-Boards and Circles of Support

Capacity:
The level of help we need depends on

- Life Experience
- Abilities
- Help we have
We All Do It
Across the spectrum of experience and abilities

SDM Is A Balancing Point

On Your Own          Guardianship
Person Centered – Person Driven

- Person Centered Planning
- Person Centered Services and Supports
- Person Centered Health Care

SDM is Person Driven

- Always – always – always ask the person what they want
  - Everyone has the Right to make choices
  - Everyone has the “capacity” to make choices
  - As long as a person can communicate in any meaningful way, they have the ability to make choices
  - People will make good choices for themselves with support

Communication is the Key
Communication MRPC 1.4 B

“A lawyer shall explain a matter to the extent reasonably necessary to permit the client to make informed decisions regarding the representation.”

Break down into parts
Small choices add up to big choices
Offer recommendations – but allow the person to make the choice
Express concerns – but don’t criticize
  ◦ “I am concerned about X”
  ◦ Not “X is a terrible, stupid, silly or bad idea.”

Always Ask the Person
SDM and Dementia

Declines in Memory and Cognition
Not a single illness
Not all dementia effects people in the same way

Early Diagnosis
- Improved treatment options (still no “cure”)
- Improved opportunities for planning and creating the supportive circle

Technology is redefining our ability
Integrating SDM into Advance Directives

I ask that my health care surrogate named in this document or otherwise empowered by law explain to me the nature of any illness, condition, or diagnosis. I ask that my surrogate explain to me the treatment options available, the prognosis, the risks and benefits of various treatment options, and the recommendations from my doctors, and then ask for my choice or preference. I ask that my surrogate continue to do this, even if it appears that I may not be able to understand what is being explained. I ask that any decisions that are made by my surrogate be based on what my surrogate thinks I would do if I were able to make the choice. When in doubt, please consult the attached documents for guidance. These documents reflect my instructions, my health care goals, and my personal values in making health care decisions.

SDM and Power of Attorney

I ask that my agent named in this document, before taking any actions using this document, always discuss with me what is being considered, what the options are, make a recommendation and seek my input. Even if it appears that I am unable to understand, I ask that my agent continue to explain to me what is happening and the choice you are making and why. Third parties can rely on my agent’s representation that they have followed this request. A failure to follow this request shall not invalidate any transaction entered into by agent using this document.
Draft in limits

Financial transactions in excess of $_______ require the signature of my agent, and either myself or _______________.

My agent shall not have authority to sell, gift or otherwise transfer any interest in any real estate that I own.

Or

My agent shall only sell, transfer or gift my home, after consultation with and agreement by ______.

The Biggest Challenges

- **Training** family, friends, caregivers, advisors, agents and guardians

- In the **principles** of person-driven decision-making
Is SDM Always the Answer?

01  SDM should be the first option

02  In cases of abuse or exploitation, SDM will only remedy the abuse or exploitation, if you can break the cycle of abuse and exploitation

03  Some Persons may become truly unable to communicate

04  For Persons experiencing changes in memory and cognition, the disease may reach the point that the Person is unable to communicate. If the advisors have practiced SDM up to that point, they will be well prepared to make decisions that reflect the decisions the person would make.

Important to Remember

• Adults are allowed to make bad choices
• The more people are empowered to make choices, the better they are at it
• Empowering people to make choices improves their quality of life
Concerns you will hear

• Abuse and exploitation
• The choices are not “in her best interest”
• He asks the same question, over and over
• She forgets the choice that she made
• It is so hard to communicate
• Sooner or later SDM won’t work

SDM Impetus

• United Nations Convention on the Rights of Persons with Disabilities (“CRPD”)
• Article 12 requires signatory nations to:
  • “recognize that persons with disabilities enjoy legal capacity on an equal basis to others in all aspects of life”
  • “take appropriate measures to provide access by persons with disabilities to the support they require in exercising their legal capacity”
  • “ensure that all measures that relate to the exercise of legal capacity provide for appropriate and effective safeguards that prevent abuse in accordance with international human rights law”
• According to the CRPD Committee, the term “supported decision-making” describes one of the ways a person can be assisted in exercising legal capacity.
Federal Support

- Americans with Disabilities Act
- Older Americans Act
- Medicaid Home and Community Based Services regulations
- Administration for Community Living (ACL)
- National Resource Center for Supported Decision-Making (NRC-SDM) since 2014

Uniform Guardianship, Conservatorship & Other Protective Arrangements Act (UGCOPAA)
### ABA Policy

SDM “be identified and fully considered as a less restrictive alternative before guardianship is imposed” and be considered a “grounds for termination of a guardianship and restoration of rights.”

### SDM: Where in U.S.?
